Inhalation: Symptoms from excessive inhalation may include coughing and difficulty breathing.

Ingestion: Large dose may cause abdominal spasms and diarrhea.

Skin contact: May cause skin irritation. Constant exposure to excessive amounts may cause eczema.

Eye contact: May cause redness, pain.

Aggravation of pre-existing conditions:

Persons with pre-existing skin disorders, impaired respiratory function, or a history of pulmonary disease should not be exposed to vapors or dusts.

B. FIRST AID

Inhalation: Remove to fresh air. Get medical attention for any breathing difficulty.

Ingestion: Treat symptomatically and supportively. Seek medical attention.

Skin contact: Wash exposed area with soap and water. Get medical attention if irritation develops.

Eye contact: Wash thoroughly with running water. Get medical advice if irritation develops.

C. TOXICITY DATA

ACUTE: This formulation has not been tested for acute or chronic toxicity. However, due to the presence of a surfactant, the formulation may be irritating to the eyes and mildly irritating to the skin.

CHRONIC: This material has not been identified as a carcinogen by NTP, IARC, OSHA. Individual monomer content does not exceed 0.1%. Use of this product may in some circumstances generate the same hazards associated with the monomers. The user should evaluate use to determine if hazards from residual monomer exist.

TARGET ORGANS: Eyes.

SECTION VI – Occupational Control Measures

Airborne Exposure Limits: -OSHA Permissible Exposure Limit (PEL): N.E.
-ACGIH Threshold Limit Value (TLV): N.E.

Ventilation System: A system of local and/or general exhaust is recommended to keep employee exposure below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, “Industrial Ventilation, A Manual of Recommended Practices”, most recent edition, for details.

Personal Respirators: If the TLV is exceeded, a dust/mist respirator may be worn up to ten times the TLV. Consult respirator supplier for details.

Skin Protection: Gloves and lab coat, apron or coveralls.

Eye Protection: Use chemical safety goggles. Contact lenses should not be worn when working with this material.

SECTION VII – Storage and Special Information
--

Keep in a tightly closed container, stored in a cool, dry, ventilated area. Protect against physical damage. Separate from incompatibilities.
